

# CLEAR PROTECTION SCREENS

Our barriers are the first to be certified as fit for purpose and manufactured to a commercial standard. Standing up to constant use, movement and cleaning for personal or public protection.

The barrier is crystal clear and is made from LUMEX a premium quality amorphous polyethylene terephthalate (A-PET) sheet. This allows 90% light transmission.

- Powder coated steel frames suitable for internal and external use
- Each barrier comes with four industrial standard lockable wheels enabling them to be easily moved from one surface to another
- Link together to form one continuous barrier and stack them when not in use
- Chemical resistance against cleaning agents, mineral oils, solvents and alcohol
